**Breast Cancer Registry of Greater Cincinnati:** Researchers in the Department of Environmental Health are creating a breast cancer registry for Greater Cincinnati. This registry will contain the names of people with breast cancer and information about their breast cancer history, residence history, occupation, family history of breast cancer, etc. The purpose of the registry is to support local studies to: 1) better understand who has breast cancer in the greater Cincinnati area; 2) facilitate studies which will identify factors which may make persons more susceptible to breast cancer such as environmental chemicals, diet, radiation and genetic factors; and 3) facilitate studies of behavioral factors related to breast cancer, health education, services and/or public policy. **Susan Piney, Ph.D.** is the Registry Director, **M. Kathryn Brown, Ph.D.** is the Registry Co-Director, and **Ms. Andrea Ice** is the Registry Outreach Coordinator. For more information, please click here. To obtain a Breast Cancer Registry Packet, please call (513) 558-0854 or email [breastcancerregistry@uc.edu](mailto:breastcancerregistry@uc.edu) and provide your name and mailing address.
